BATH COLLECTION

Borrowed Earth brings nature into living spaces through surfaces and sculptures crafted from natural stone.

These pieces are characteristically textured and sculptural forms, that celebrate the union of nature's beauty and human craftsmanship.

Designed to transform bathrooms into serene retreats, these timeless art forms enrich daily rituals.

Shall we say, your sanctuary awaits...

Each piece of stone showcases unique patterns, colors, and textures, making every application one of a kind. Emphasizing these variations celebrates the intrinsic beauty of natural materials.

PRODUCT POSSIBILITIES

Celebrating the union of nature's beauty and human craftsmanship. Featuring a range of products, each piece is carved from exquisite stones, which combine to form variations and interest in the bath space.

6 SERIES | 6 PRODUCTS | 5 MATERIALS | VARIABLE SIZES

SERIES VARIATIONS

This collection pays homage to the timeless allure of natural stone, with each handcrafted piece showcasing its unique character. Inspired from nature, brought to life in stone, each variation plays with the striations in nature to design works of art.

Designed to transform bathrooms into serene retreats, these pieces enrich daily rituals, offering beauty that transcends trends.

SUSTAINABILITY COMMITMENT

At Borrowed Earth, we believe in honoring the materials we work with. Our Bath Collection is crafted with sustainability at its heart—using natural stones responsibly sourced and carefully shaped to minimize waste. This collection embodies our commitment to creating beauty that respects the earth, reducing our environmental footprint while celebrating the raw elegance of stone.

The inherent artistic quality of each piece elevates it into something more than a bathroom fixture, offering a timeless expression of functional art.

The Borrowed Earth Bath Collection is an invitation to reconnect with the natural world, to bring the quiet power of stone into your home. Each piece is a reflection of our belief that beauty lies in simplicity, in materials that speak of the earth's enduring grace. Handcrafted and unique, these pieces transcend style and trend, transforming your space into a sanctuary of calm, luxury, and timeless design.

BUILDING A
SUSTAINABLE FUTURE

ONE STONE MANY PIECES

Spaces incorporates bricks, tiles/panels, bathroom products, objects, carved from a single block of stone.

USING REMNANTS

Repurposing leftover materials — one of the more imaginative outcomes is creating bricks that can be used as a building material.

ECO-FRIENDLY MATERIALS

Transforming quarry remnants into bricks represents a sustainable approach to building, where the lifecycle of stone is extended, contributing to more eco-conscious construction practices.

ENVIRONMENTAL IMPACT

This practice highlights stone's role in sustainable development by conserving natural resources and minimizing quarrying activities, aligning with global sustainability goals.

MODERN APPLICATIONS

Utilizes stone's natural beauty and durability to create spaces that pay homage to historical construction methods while meeting contemporary design standards.

BUILDING A SUSTAINABLE FUTURE

DISCLAIMERS

MATERIAL CHARACTERISTICS

Each piece in the Borrowed Earth Bath Collection is crafted from natural stone, making it inherently unique. Variations in color, veining, texture, and natural fissures are a testament to the material's natural origin and are embraced as part of its beauty, not flaws or defects.

Borrowed Earth celebrates the perfect imperfections of each block of stone, honoring the natural veining, mineral inclusions, and occasional fossils that make every piece distinct. These elements highlight our commitment to sustainability and a ZERO WASTE INITIATIVE, which involves carving multiple elements from a single block wherever possible.

SEALANTS AND PROTECTION

Pieces in this collection are not pre-treated or sealed with any protective coatings. Clients who prefer additional protection may choose to apply a sealant after installation. A professional stone specialist can provide guidance on selecting and applying a sealant suited to the specific material and environment.

Re-sealing may be considered over time based on usage and exposure to water, but it is not mandatory.

MATERIAL HANDLING

Natural stone is heavy and can be fragile. Proper handling equipment and techniques, such as lifting straps or dollies, should always be used during transportation and installation to prevent damage or injury.

Professional installation is highly recommended to ensure the product's safety, proper alignment, and long-term performance.

CARE AND MAINTENANCE

Clean stone surfaces using a soft, damp cloth or sponge and mild, pH-neutral stone cleaners. Avoid acidic cleaners (e.g., vinegar, lemon) or harsh chemicals, as they can etch or discolor the surface.

Spills should be wiped promptly to avoid staining, especially for porous stones like marble or limestone.

Avoid abrasive scrubbing tools or sharp objects that may scratch or damage the surface finish.

HEAT, MOISTURE, AND ENVIRONMENTAL SENSITIVITY

While durable, natural stone is sensitive to prolonged exposure to extreme heat or direct sunlight, which can cause discoloration or structural stress over time.

Borrowed Earth's natural stone products are designed to age gracefully, with changes in tone and texture over time adding character and authenticity to the material.

INSTALLATION CONSIDERATIONS

Waterproofing is essential for areas exposed to frequent water contact, such as bathrooms, to protect both the stone and surrounding surfaces.

Only adhesives, grouts, and installation materials compatible with natural stone should be used to prevent chemical reactions or weakening of the product.

Custom pieces may have slight dimensional variations due to their handcrafted nature. On-site verification of dimensions is recommended before installation.

CUSTOM AND PRE-ORDERED PRODUCTS

The Pieces of Borrowed earth bath-ware collection are made to order and are non refundable nor returnable once the order is placed. Clients are encouraged to confirm all details before finalizing orders.

INSPECTION AND ACCEPTANCE

We offer white glove delivery service only. An estimate of delivery costs will be provided based on Delivery address and specific requirements when consulted with your account manager.

Clients are invited to inspect at the time of unboxing when delivered and keep a visual record for any visible damage from transportation and refuse if damaged. This ensures satisfaction with the materials unique characteristics. Including veining texture and finish.

Once the pieces leave the warehouse, Borrowed Earth cannot offer refunds, replacements, or exchanges. Proper inspection and approval are key to ensuring client satisfaction.

Goods shall be deemed to have been delivered from the moment the Seller has informed the Client that the goods – whether or not to be assembled in full or in part – are ready for collection from the Seller or a third party or for shipment at the order of the Client. From the moment of delivery, all risks associated with the delivered goods transfer to the Client.

GUARANTEE

If the Seller (or the seller's supplier) provides a guarantee to the Client with regard to the work or goods delivered or to be delivered by it, it shall explicitly inform the Client of this in writing. In the absence of such explicit written notification the Client cannot invoke any guarantee, however without prejudice to its statutory rights resulting from mandatory statutory provisions.

In case of a valid guarantee claim by the Client, the Seller is entitled at its discretion to either repair or exchange the delivered goods, unless this has become demonstrably futile for the Client in the meantime. If the Seller notifies the Client that it will proceed to repair the goods, the Client shall, at its own cost and risk, put the delivered goods at the disposal of the Seller.

All guarantee obligations of the Seller shall cease to apply if the defects or imperfections in the supplied goods as put forward by the Client are the result of (i) any incorrect, careless or incompetent use (including dropping or hitting the product) or management of the goods by the Client, their representatives or third parties; (ii) a modification of the delivered goods to which the Seller did not agree by the Client, their representatives or third parties; or (iii) any external causes such as, but not limited to substances such as acid, fire or water damage.

SUSTAINABILITY COMMITMENT

As part of our ZERO WASTE INITIATIVE, Borrowed Earth carefully carves multiple components from a single block of stone, fostering efficient material use and a cohesive aesthetic. Variations in tone or pattern are a natural outcome of this process and are celebrated as part of the material's story.
